Dear Mr. Chesman:

Thank you for your recent correspondence concerning the 99/4A Home Computer.

We are not facilitated in our department to provide custom programming assistance. If in attempting to program your application you experience any difficulties, if you will send a current listing of your program along with explanations to the letterhead address, we will be glad to assist you.

If you have any further questions or comments, please feel free to contact me at the letterhead address.

Sincerely,

M. D. Archuleta

Gentlemen:

Please show me how to program these two formulae into my TI 99/4A.  
Perhaps the accompanying example will help.

Thank you,

$$P(\text{below}) = N\left(\frac{\ln\left(\frac{q}{p}\right)}{\sqrt{t}}\right)$$

N = cumulative normal distribution

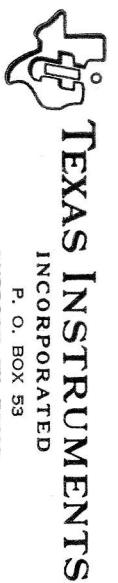

p = current price of stock

$$P(\text{above}) = 1 - P(\text{below})$$

q = price in question

$\ln$  = natural log

$t$  = time period
